New York, NY (March 27, 2020)--On **March 27**, legendary singer-songwriter **Justin Hayward** will release the digital-only EP ***One Summer Day / My Juliette***. This two-track release will be available via all digital service providers.

Whether performing solo or with **The Moody Blues**, **Justin Hayward's** songwriting is known for its thought-provoking lyrics and inventive melodies. These qualities are fully displayed in the new tracks "**One Summer Day**" and "**My Juliette**."

"**One Summer Day**" is written in a conversational style, telling the story of unexpected events taking place one day in the summer. According to **Justin**, the song came about in an organic manner. "[It] just sprang out of my old Martin guitar late one evening...I had been playing the riff for a while just for fun, without realizing it could actually be a song."

“My Juliette,” which references Andy Williams’ early 60s recording of “Moon River”, was inspired by **Justin’s** childhood fascination with the theater. His mother played piano for a repertory theater group during a summer in his childhood. He played guitar for the company, and was drawn into the artistry of the stage, from Shakespeare to pantomime. “I was entranced and I still treasure every moment of that theatre life,” **Hayward** continues. “I had the song for years before I was sure I wanted to actually finish or record it because I enjoyed just playing around with it.”
